

Slash Removal At The Airport

Exerts from A.J.'s field notes

:

Date: 7-16/17-02

Weather: Hot but kind of barable

Mood: It was tedious, not my favorite project.

Objective: Seeing if the parks purchasing of a chipper would be a good idea. And to clear out unsafe branches and wood piles.

Stacy & Tim working the chipper.

AJ playing the guitar.

Description of Work: We removed piles of brush that were a fire danger to be fed into a chipper that the park's botanist was running.

The project was, at least in my opinion, a success because we did manage to clear out a pretty large pile of branches.

Valerie working.
